

Beer Packaging Box

Zemeijia is China manufacturers and suppliers who mainly produces beer packaging box with many years of experience. Hope to build business relationship with you.

Zemeijia can assist you in selecting the proper style, whether your primary goal is to preserve the bottle during transit or to create a bespoke gift box for the bottle. Stiff boxes, folding cartons, and corrugated boxes are among the **beer packaging box** options we provide. Depending on your needs, these can be custom printed or left plain. Our **beer packaging boxes** are custom-made to your specifications and may be customised in every way, including board thickness, size, depth, colour, and printing.

The best feature of beer boxes is quality and reliability. So, these need to be of optimum thickness, which can easily carry the weight of beer bottles and cans. Having dividers between these would prevent the contact of one glass beer bottle to the other and prevent breakage.

- Standard FEFCO designs & bespoke requirements available
- Single-walled or double-walled corrugated material
- Standard finishes include KRAFT (brown), white, LT (recycled paper)

and TEST (recycled inner liner). White papers can be coated to provide with superior substrate for greater print quality

- Print options include litho (up to 8 colours), digital (CMYK), flexo (up to 5 colours) and silk-screen (typically 2-3 colours)

Specifications :

Dimension & Style: Custom Shapes & Sizes

Minimum Order Quantity : 5000 Boxes Minimum Order Required
Paper Stock 12pt to 24pt (C1S/C2S)
Cardstock, Eco-Friendly Kraft, Corrugated
Cardboard, Bux Board

Printing: CMYK (1 - 4 color), PMS, CMYK+PMS, No
Printing (Plain)

Finishing: Gloss/Matte Lamination, Aqueous Coating,
Spot Varnish, UV Coating, Embossing,
Debossing, Foil Printing

Included Options: Die Cutting, Perforation, Scored, Gluing

Proof: Electronic Proofs (flat
view/3D mockup), Digitally Printed Proofs(without any major finishing
effects), Physical Sampling (on request).

Features of beer packaging :

1. Food grade paper board , with or without PE coated inside are available

2. Can with or without PLA / PET / PE /OPP clear window
3. Customised design is welcome, flexo or offset printing available
4. Can be custom print your company logo as your requested
5. SGS,FDA certificates, can directly contact with food, Eco-friendly
6. Will pack according to our standard export packaging
7. Export to all over the world. Welcome come to us.

Why choose us ?

1. 100% Factory & manufacturer, saving your costs than buying from trading company.
2. Professional equipment and facility, such as advanced Printing & cutting machine.
3. Experiences designers and technician of packaging and printing aspect for various products.
4. Strict quality control system, make sure every piece of product to be 100% qualified.
5. With efficient management and high productivity, short delivery time within .
6. Near Sea Port and Air port, quite convenient for business and transportation.

Printing Works Process:

1. Typesetting and Composition
2. Copy Assembly and Process Photography

3. Image Carrier Preparation

4. Photomechanical Image Carrier Preparation

5. Light-sensitive Coatings

6. Photopolymeric Coatings

7. Diazo Coatings

8. Bichromated Colloid Coatings

Corrugated & Cardboard Box:

1. Pulping the pine chips

2. Making kraft paper

3. Shipping and storing the kraft paper

4. Corrugating the cardboard

5. Forming the blanks into boxes

6. Quality Control.

Beer packaging surface treatment :

1. UV Spot: Ultra-violet cured coatings can be applied over ink printed on paper and dried by exposure to UV radiation. UV coatings can be formulated up to 100% solids so that they have no volatile component that contributes to pollution. This high solids level also allows for the coating to be applied in very thin films.

UV coatings can be formulated to a wide variety of gloss ranges. UV coating can be applied via most conventional industrial coating applications as well as by silkscreen.

2. Glossy finish: Art papers are one of the highest quality printing papers and are used for illustrated books, calendars and brochures. The grammage varies from 100 to 230 g/m².

These papergrades are triple coated with 20 - > 40 g/m²/side and have matte or glossy finish. Higher qualities often contain cotton.

3. Matt Finish: A dull finish or surface, as opposed to a shiny one.

4. Varnish: Resin dissolved in a liquid applying on wood, metal, or other materials to form a hard, clear, shiny surface after dry.

5. Foil Stamping: Typically a commercial printing process, is the application of metallic or pigmented foil on to a solid surface by application of a heated die onto foil, making it permanently adhere to the surface below leaving the design of the dye.

6. Embossing: The raising of paper and other non-metal products using specific tools to accomplish the task.
