Five layer postal corrugated box cardboard after die cutting, indentation, nail box or glue box to make corrugated boxes. Five layer postal corrugated boxes are rigid paper containers made of corrugated board. Five layer postal corrugated box is one of the most widely used packaging products, the amount has been a variety of packaging products first.

Five layer postal corrugated box is a main material for commodity transportation packaging. The production of corrugated and corrugated cardboard boxes began in the late 19th century and developed rapidly in the early 20th century. Five layer postal corrugated boxes are light in weight, cheap in price, can be large-scale production of a variety of sizes, storage space is small before use, and can print a variety of patterns, so it

is widely used in the packaging and transportation of finished products. When picking your box, remember that dimensions are given in order - Length x Width x Depth for the box interior. Length and width represent the box opening.

Note: Length is the widest dimension of the opening into the box. Width is the smallest dimension of the opening into the box. Depth is the distance into the box from the opening to the bottom of the box.

Welcome everyone to purchase our company' s five layer postal corrugated box! Thank you for your trust in our company and products!
